Skills

Languages & Frameworks : HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js

Styling & UI : Tailwind CSS, SCSS, Framer Motion, shadcn/ui

API & Backend Integration: REST APIs, GraphQL, Supabase, Firebase, Clerk Authentication, GraphCMS, Strapi CMS

AI, Automation & LLM Tools: Cursor, Replit, Lovable, Google Antigravity, OpenAI SDK, LangChain, n8n

Tools & Platforms: Git, GitHub, Vercel, VS Code, NPM, Yarn

Experience

Frontend Developer

ControlShift AI
08/2025 - Present

- Frontend lead responsible for building and scaling the product **from scratch (0 → 1)** at ControlShiftAI.
- Architected and developed a production grade frontend using **React / Next.js**, with a strong focus on performance and UX.
- Led a frontend team, set coding standards, and ensured high-quality, maintainable code.
- Integrated AI powered APIs and complex data flows into intuitive user interfaces.
- Worked cross functionally with backend, AI, and product teams to ship features end-to-end.

Frontend Developer

LLMate AI
10/2023 - 04/2025

- Built the full frontend of LLMate.ai's AI-powered analytics platform and marketing site using Next.js, React, and Tailwind CSS. Enabled natural language-driven data exploration.
- Delivered **dynamic dashboards and conversational UI** for LLMate Studio, enabling users to ask questions, explore trends, and visualize real-time insights without technical barriers.
- Built **multiple RAG (Retrieval-Augmented Generation) chat applications** to allow users to ask follow-up questions, explore documents, and extract contextual insights from their data sources.
- Owned frontend architecture and rapid delivery of AI-first product features.
- Implemented advanced features like pivot tables, custom chart widgets, AI-generated reports, file uploads (CSV/Excel), and automated publishing tools to support end-to-end data workflows.
- Collaborated closely with product designers and backend engineers to **integrate real-time data pipelines and LLM responses**, ensuring a fluid, chat-like analytics experience.
- Engineered **SEO-optimized, blazing-fast landing pages**, increasing organic traffic by **3x** within the first 2 months.
- Prioritized performance, achieving **and 100% Lighthouse scores across key pages for improved user experience**.
- Owned frontend architecture and rapid delivery of AI-first product features.

Front End Developer

Vedic Rishi Astro

07/2022 - 01/2023

- Developed a collaborative environment for all team members, creating a strong sense of community and empowerment
 - Designed a new web application to increase collaboration among design, engineering and sales teams, resulting in a 10% increase in revenue in one quarter
 - Built a custom web application for a major client, successfully delivering an integrated CRM system in just 2 weeks
 - Maintained a clean, professional and creative web presence for the company to convey the professional image of the organization
 - Used Adobe InDesign to design, edit and layout the company's print & digital collateral
 - Optimized web application performance by implementing lazy loading, code splitting, and caching strategies, resulting in a 40% faster page load time and improved user retention.
-

Education

Diploma in Taxation Law (DTL)

Savitribai Phule Pune University • Pune

Bachelor of Commerce (B.com)

Dr. Babasaheb Ambedkar Marathwada University • Aurangabad

Personal Projects

Promto.io — Social network for AI prompts

- Google OAuth & Supabase Auth
- Admin panel to manage platform: feature flags, config, moderation
- Social feed with hybrid ranking (following, trending, discovery)
- Creator profiles, follow/like system, and prompt portfolios
- Credit-based image generation (image-to-image + prompts)
- Payments & subscriptions via Lemon Squeezy + webhooks
- Pro creator tier and subscription-based premium prompts
- Vector search (pgvector) for semantic “similar prompts”
- SEO metadata generation (titles, descriptions, tags) at scale
- Database triggers (e.g. auto SEO when post hits like threshold)
- Short prompt codes (shareable links by code)
- Installable PWA
- Redis cache for high performance
- CDN image optimization for high performance
- Performance: memoized lists, skeleton loaders, error boundaries

Tech: Next.js, React, Supabase, Lemon Squeezy, pgvector, Redis, PWA.
